

This website is devoted to seeing through the illusion and providing effective action plans to unravel the web of deceit that surrounds us.

The advantage that the collectivists have is that they have been organized and constant in their

pursuit of domination. They own the media, most high level politicians, they have laws protecting their corporate monopolies, control over finances and banking and they influence the younger generations in schools.

However, we have the numbers- this is vital. And the truth.

The goal is to provide workable models that can be replicated for local action, expanding upward, in order to regain freedom.

Creating a vision of what we do want, organization and using successful models are essential. We can restore freedom- together we win.
