The media [hailed](#) Warren Buffett last December for donating \$50 million dollars toward a United Nations nuclear bank with control over uranium enrichment. The intent is control over nuclear weapons and nuclear power by the elites who are the true forces behind the UN.

The UN nuclear bank will be under the authority of the International Atomic Energy Agency (IAEA), which is NOT independent; it was created through a UN treaty and answers to the UN and the UN Security Council. The fully funded UN nuclear bank does not require nations to stop uranium enrichment, which was the original [plan](#) ; however, the final terms have not been set. The fuel bank will sell enriched uranium for power plants to countries in "[good standing](#)". Therefore, only countries who kow-tow to the UN and IAEA will be provided with enriched uranium.

The United Nations is a supranational entity that answers to no one. After WWII, the UN was sold to the public as an voluntary collection of nations committed to peace and ending war. The UN pretends to vote on issues democratically, but its true goal is a totalitarian world government ruled by the elites at the top. They are happy to bully countries and go to war over resources, as evidenced by the UN resolution last week to attack Libya. They claim that war is necessary for peace.

The UN nuclear bank will consolidate power under the UN for nuclear energy and weaponry, which is another piece of UN Agenda 21, the blueprint for total control and depopulation.

UN WORLD DOMINANCE

Four things are needed to take political control over a population (the UN has set its sights on the entire world):

1. Money
2. An army
3. Control over the media
4. Control over education

If you have enough money and an army, then control over the media and education are useful but not essential.

UN NUCLEAR BANK FINANCING

Warren Buffett proposed the UN [nuclear bank](#) and made a self-serving "donation" of \$50 million while demanding matching funds of \$100 million from governments. Obama provided \$50 million in US taxpayer money and the EU, UAE, Kuwait and Norway made up the rest. At \$150 million, world domination is astonishingly cheap! Buffett, a proponent of [depopulation](#), was celebrated as a hero in the media because most people are ignorant about the UN's true goals.

Warren Buffett is in the energy utility business and owns MidAmerican Energy; his motivation for "donating" to the UN nuclear bank could benefit him later with regard to a UN monopoly over nuclear power for electricity.

Taxpayers will ultimately fund the UN nuclear bank that is in opposition to public interest and freedom. This trick is accomplished through foundations convincing governments to regulate or take action on an issue and then passing the cost on to taxpayers (click [here](#) to find out how individuals create public policy that has been used for depopulation).

Buffett proposed the UN nuclear bank through a foundation that he provides funding, called the '[Nuclear Threat Initiative](#)' (NTI). Ted Turner, known for supporting depopulation, is co-chairman of the Nuclear Threat Initiative and Sam Nunn, a former US Senator, is the other co-chair of NTI.

NUCLEAR SECURITY PROJECT

Nunn is the front man working with Cold-War hawks Henry Kissinger, former Secretary of State, George Schulz, former Defense Secretary and William Perry, former Secretary of State in the '[Nuclear Security Project](#)' to dismantle nuclear weapons. This project is supported by Zbigniew Brzezinski, Madeleine Albright, Colin Powell and many others.

Nunn, Kissinger, Schulz and Perry are aggressively pushing the dismantling of nuclear weapons through the US-Russia-UN [START](#) Treaty and the UN Non-Proliferation Treaty. The objective of these types of treaties, according to Department of State Publication [7277](#), is to disarm states to a "point where no state would have the military power to challenge the strengthened UN Peace Force...."

Buffett has provided funding for the Nuclear Security Project, too. Buffett said that an atomic attack on the US by mid-century is a "virtual certainty". In my opinion, with psychopaths like Buffett, Turner and Kissinger (a Rockefeller lieutenant) at the helm, this is practically unavoidable.
