The true facts of life are that the globalist control freaks have caused environmental disasters in order to implement their solutions, which are even worse. And they get public support through lies, government regulations and our tax dollars. UN Agenda 21 Sustainable Development is the overarching blueprint for depopulation and control using the environment as the excuse.

Last month the UN announced that they were shifting their focus from global warming (which has been thoroughly discredited) to [biodiversity](#), which is really a way to steal land by way of the Endangered Species Act. In fact, a new UN agency has been created to monitor biodiversity (Intergovernmental Science Policy Platform on Biodiversity and Ecosystem Services or IPBES), and is based on the UN's fraudulent IPCC. The new fear that is being created is the destruction of habitats and species resulting from human activity

These videos by Dr. Michael Coffman explain the impact of the Endangered Species Act:

## THE BIRDS

Have you wondered why BP Oil used Corexit in the Gulf? There is evidence that the motive was to kill as many birds and sea creatures as possible to usher in the expansion of the [Endangered Species Act](#) (ESA) in addition to the \$40 million in profits for NALCO (Corexit manufacturer) and the motive of submerging the oil from public view. There are numerous non-toxic alternatives to Corexit, which are still ignored by the EPA. The ESA will be used as a weapon to prevent further drilling and America's energy independence. It is falsely being sold as the way to avoid future catastrophes and because most people love animals, they will be easily fooled.

Have you noticed that environmental groups are far less concerned with taking effective action in pressuring BP Oil, Obama and Congress to stop and the spill, and are instead filing lawsuits to stop drilling and promote inefficient solar and wind energy? The environmental groups' lack of action against BP Oil and the EPA is glaring. Instead, they are pursuing the expansion of governmental regulations by way of the ESA. Most environmental groups, and certainly the big ones like WWF, Greenpeace, NRDC and the Sierra Club, are controlled opposition. They are [funded](#) by your tax dollars, oil [companies](#), the UN and foundations like the Rockefeller and Ford foundation.
